

OLUWATOSIN DEBORAH AJINOMISAN

ajinotosin@gmail.com | Portfolio: <https://oluwatosinajinomisan.netlify.app/> | Lagos, Nigeria.

Aspiring Cybersecurity Analyst with hands-on experience in threat detection, phishing investigation, network traffic analysis, and vulnerability assessment. Combines a strong foundation in Python and machine learning with practical cybersecurity skills to help organizations identify risks, respond to threats, and strengthen their security posture. Actively building towards a career in security operations and cyber defense

SKILLS

- Threat Detection and Analysis
- Vulnerability Assessment
- Network Security
- Phishing Investigation
- Cyber Risk Management
- Security Operations Fundamentals
- Ethical Hacking Fundamentals

Tools: Wireshark, Nessus, Linux CLI, Kali Linux, Burp Suite

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Report Writing

Programming: Python, Machine Learning, Neural Networks, Google Colab, VS Code.

WORK EXPERIENCE

Ethical Hacking Trainee — TechCrush

(May 2026 – Present)

- Conducted reconnaissance and information-gathering activities in controlled environments to identify targets and map attack surfaces.
- Performed vulnerability assessments and security testing exercises to identify weaknesses and document findings.
- Executed ethical hacking activities against lab environments using Linux-based security tools and methodologies.
- Carried out scanning, enumeration, and system analysis exercises aligned with penetration testing workflows.

Cybersecurity Trainee — TechCrush

(Feb 2026 - Present)

- Built a threat analysis platform supporting security monitoring and investigation workflows.
- Conducted email security analysis to identify phishing indicators, suspicious artifacts, and attack patterns.
- Performed vulnerability scanning and evaluated findings to support remediation planning and risk management.
- Analyzed network traffic using Wireshark and created security playbooks for incident response activities.

Cybersecurity Trainee — INCO Academy

(Feb 2026 – April 2026)

- Built a capstone project focused on phishing detection and threat analysis workflows.
- Applied machine learning concepts to support phishing identification and classification activities.
- Performed project-based vulnerability assessment and security analysis exercises.
- Utilized risk management and security operations concepts within practical activities.

AI & ML Engineering Trainee — TechCrush

(Dec 2025 – Mar 2026)

- Built machine learning models using Python across VS Code and Google Colab environments.
- Applied predictive modeling techniques across analytical and cybersecurity-focused use cases.
- Conducted model experimentation and evaluation workflows for performance optimization.
- Implemented deployment workflows for model integration and testing.

Data Analysis Trainee — Ideainnovate Africa

(Feb 2026)

- Performed data cleaning, transformation, and exploratory analysis on structured datasets.
- Applied analytical methods to generate insights and reporting outputs.
- Interpreted datasets to identify trends and patterns.
- Created visual reports to communicate findings effectively.

Research & Administrative Assistant — Flowealth Academy

(Dec 2025 – Jan 2026)

- Conducted structured research supporting educational and technology initiatives.
- Managed professional correspondence and administrative documentation.
- Coordinated training activities and internal operations.
- Maintained records and supported organizational workflows.

EDUCATION

B.Sc (Ed) Science Education

2021-2025

University of Lagos

Second Class Upper (2.1)

NCE Science Education / Computer Science

2017-2021

Federal College of Education (Tech.), Akoka.

Second Class Upper (2.1)

CERTIFICATIONS

Basics of Cyber Crime Attacks and Threats - **Uniathena**

Basics of Cyber Crimes – **Uniathena**

Artificial Intelligence - **TechCrush**

Basics of Machine Learning and Algorithm - **Uniathena**

Data Analysis - **Idealnovate Africa**

PROJECTS

ThreatScope — Threat Detection & Analysis Platform

Live Demo: <https://threatscope-zfdrvh6mdqzpc5ut3hyjs.streamlit.app/>

Tech Stack: Python, Streamlit, Pandas, Plotly, Threat Intelligence APIs, Custom IOC Classification Engine

- Threat analysis platform supporting security monitoring, investigations, and threat assessment workflows.
- Integrated Threat Intelligence APIs and leveraged a custom IOC classification engine for indicator analysis and categorization.
- Utilized **Pandas** and **Plotly** for visualization and analytical reporting of threat data.
- Deployed through **Streamlit** to provide interactive threat analysis workflows.

PhishGuard — Hybrid Phishing Detection System

Live Demo: <https://phishguard-njdwambwj9a4d2j7bnq32z.streamlit.app/>

Tech Stack: Python, XGBoost, Neural Networks, Streamlit, VS Code

- Hybrid phishing detection system supporting email security analysis and phishing identification.
- Applied **XGBoost** and neural network techniques for phishing classification and suspicious pattern analysis.
- Utilized machine learning workflows to evaluate phishing indicators and attack characteristics.
- Deployed through **Streamlit** with an interactive detection interface.

AARIS-LITE — Intelligent Academic Analytics Platform for African Universities

Live Demo: <https://aaris-lite-fdcj4zjtuhwsbnpfxdhfjz.streamlit.app/>

Tech Stack: Python, Random Forest, Data Visualization, Streamlit, VS Code

- Academic analytics platform supporting student performance tracking and institutional insights generation.
- Utilized **Random Forest** models for predictive analytics and academic performance forecasting.
- Integrated visualization components for trend analysis and reporting.
- Deployed through **Streamlit** for interactive access and analytics reporting.

Salary Prediction Web Application

Live Demo: <https://salaryprediction-mndkwf96hia6zskd3hyapl.streamlit.app/>

Tech Stack: Python, Machine Learning, Streamlit, VS Code

- Salary prediction application supporting data-driven salary estimation workflows.
- Applied machine learning techniques for predictive analysis using structured datasets.
- Utilized analytical workflows for salary estimation and pattern evaluation.
- Deployed through **Streamlit** with an interactive prediction interface.
